

## Reverse Osmosis Water Purification

Purified, Fresh Drinking Water  
for Your Home and Family

# Fresh, Safe Drinking Water

Water. Nature's perfect beverage. Our Reverse Osmosis eliminates contaminants to return water to it's natural state.

## Cleaner Drinking Water

Imagine a glass of crisp, clean water. Clearer ice cubes, and no after taste.

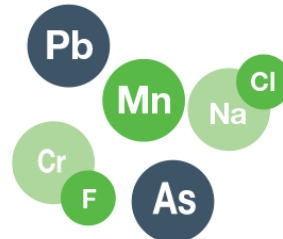

## Richer Beverages

Bring out the flavor of your coffee or tea. You'll taste & see the difference.

## Cost Effective

You can purify your own water for about 20¢ a gallon.

## More Effective

Certified protection against contaminants for piece of mind.

# Engineered for Excellence

## 1. Macrofiltration

5 micron pre-filter removes particles like dirt and sediment to improve membrane life and performance.

## 2. Carbon Pre-Filtration

Special compressed carbon block design removes lead, organic chemicals, chloramines, and chlorine.

## 3. HE Membrane Purification

Water is forced through pores 1/1000th the width of a human hair. NSF certification verifies up to 75 gallons per day with 96% average removal of water contaminants like arsenic, lead, mercury, nitrates, and sodium.

## 4. Pure Water Storage

Standard 4 gallon stainless steel tank keeps water safe for fresh, clean taste. Also available in larger sizes to supply multiple locations.

## 5. Polishing Filter

Specialty filter provides enhanced VOC reduction. Unique carbon design produces “fresher” tasting water.

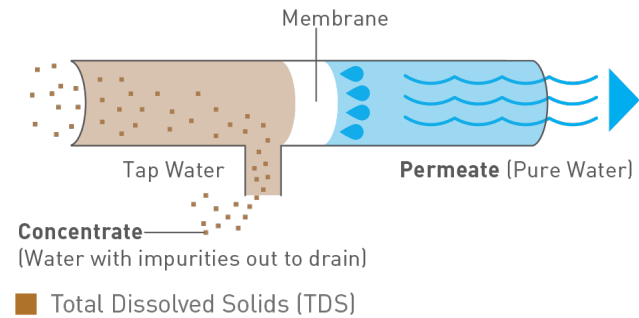

# RO Technology Transformed

RO membranes work by separating dissolved solids like salts and metals from your water.

Here's the problem: other RO membranes waste 4+ gallons of water for each gallon they purify.

Pentair's new technology has solved that problem. You get clean water - without the waste!

RO

GRO

=

**2,190 Gallons**  
of water saved per year

# Designed For Your Needs

Not every home is the same - you're Reverse Osmosis system doesn't have to be either!

Customize your system to match your home's style and your family's needs!

# Local Water Experts

Our passion for high quality water began in 1978. Our clients were transformed into water critics – lousy city and well water was turned into a soft, clean, great-tasting experience.

We have partnered with leading manufacturers to give Premier Water treatment systems unrivaled performance.

And of course, every system is planned with exceptional customer service, installed with an attention to detail, and maintained like it was in our own home.

Only Premier Water offers the features, sizes, and options to conquer the worst water, any way you like.

7887 Fuller Rd, Suite 106, Eden Prairie, MN 55344 - (952) 767-0230
